

Tool 1E.

Sub-national cross-sectoral coordination mechanisms

How to use this tool

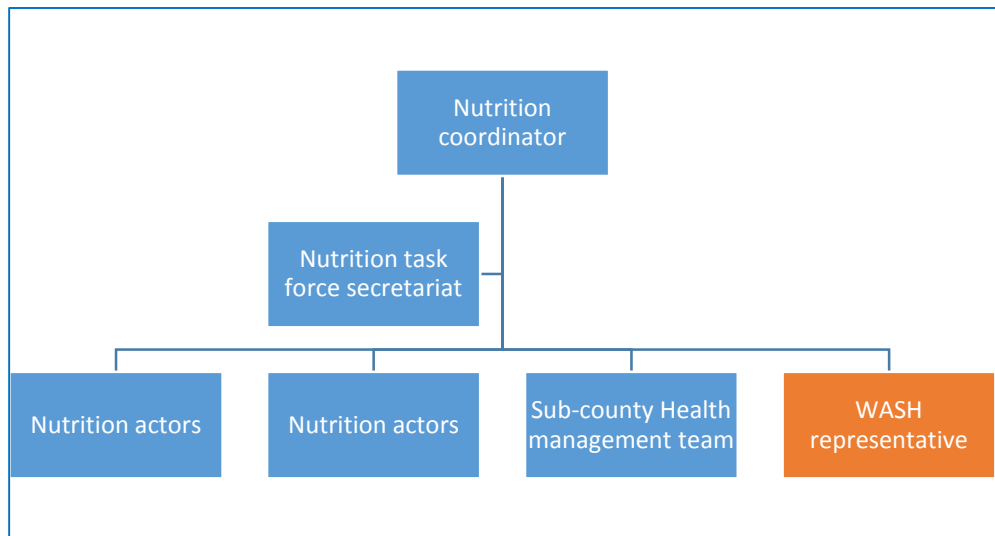

- This tool shows how more synergy can be achieved between WASH and Nutrition coordination forums at the sub-national level
- It provides an alternative mechanism for ensuring that both sectors take into account the activities and priorities of the other sector
- Representatives can make sure that information about their sector is shared at the other sector's coordination meeting and where there are concerns or issues they can bring them to the attention of the stakeholders. For example, where nutrition surveys show a particular hotspot of acute malnutrition, WASH actors can be asked to investigate the WASH situation in that community. Conversely, if a WASH program is carrying out behaviour change communication activities and there is an opportunity to work together with nutrition teams visiting the same communities. this can be planned through the coordination forums.

WASH SECTOR COORDINATION FORUM

Nominated representative from WASH coordination forum

NUTRITION TASK FORCE

Nominated representative from Nutrition task force
